# Problems...

**We have solved a multi billion dollar problem**

## **Coding is expensive**

**Shortage of Coders ..  
worldwide**

## **Time-consuming**

It requires a good amount of time to develop the basic backend frontend

## **Tedious and Boring**

Coding is tedious , boring and **error-prone.**

**Most of coders hates coding**

uCode.ai combines the power of artificial intelligence, machine learning, and a robust code generation engine to produce high-quality full-stack CRUD codes.

## **Super Budget Friendly**

A large scale Full-Stack working code can be generate in fraction of a budget previously allocated

## **Super Fast Development**

uCode.ai generates Full-Stack CRUD codes in a matter of minutes

## **Happy coding for all**

Say goodbye to tedious coding tasks and welcome a new era of rapid development.

# How it Works ?

---

**60-70 % codes of any business application is CRUD operations and uCode.ai will generate it in minutes !!**

**CRUD= Create , Read , Update Delete**

# Our Product service

---

- Define your data model and requirements.
- uCode.ai understands your needs and generates full CRUD codes
- Fine-tune your your code and add business logic.
- Download generated code for immediate use.

# Traction

We already have some have  
some traction

A Qatar based software company used  
our platform to generate **3 Dashboard**  
web application.

The system charged **2900 USD**.

This happen in our internal **test release**

# Market Potential

## Global Digitalisation

Digitalisation is a norm everywhere which prompt massive software development project.

## AI is trending

AI is trending and people **desperately** looking for **AI** tool for repetitive and tedious task.

## Time, Money and effort

If a tool can save your time, money and effort it will be definitely game changing.

# Size the Market

The global software market size was estimated at USD 589.6 billion in 2022 and it is anticipated to reach around USD 1,789.14 billion by 2032

## 589.6 Billion

Total Available Market (TAM)

---

## 5.8 Billion

Serviceable Available Market (SAM)

---

## 1 Billion

Serviceable Obtainable Market (SOM)

# Competitive Advantages

There are lots of AI platform which can generate code but uCode.ai is the only platform which generate full Project code ie.

- 1) **Back-end**
- 2) **Web Front-End**
- 3) **Mobile App**
- 4) **Test-Automation and document.**

# Use Cases

Potential Customer

## **Startup MVP**

Quickly build a Minimum Viable Product to validate ideas.

## **Free-lancer**

uCode.ai can help Freelancers to handle multiple project in limited timespan

## **MNC**

Lots of MNC have old and sluggish software , they can revamp their product super-fast

## **Tech-Company**

Focus on functionality and innovation within tight timelines.

# Business or Revenue Model

uCode.ai will charge as per project volume.  
Project volume is determined by number fields in the database

There is free credit available so that user can do some Trial before purchase.

# Road Map

**June -2024**

Version 2 Release  
With Major Framework  
support for  
Back-end , Web and Mobile

**Dec -2023**

Version 1 Release  
Mobile App Generation

**Aug -2023**

Beta Released  
Generate Backend and Web  
App

# Meet our Team
