

SITEPLAN

Siteplan

Start small, grow big

Overview

A new way to build Django website. Siteplan comes with CMS, e-commerce store, payment gateway, task queue and many more features commonly found in modern websites.

FRAMEWORK

Provides quick way to start writing code in Django

Provides frontend tooling integration

CMS

Add, edit and organize pages/blogs

Upload images, document, video etc

[Back to Agenda Page](#)

What problem it solved?

Default Django project too barebone - no pre-populated data, no frontend tooling

High time-to-code

[Back to Agenda Page](#)

Usage

```
pip install siteplan  
siteplan init-app  
siteplan run
```

[Back to Agenda Page](#)

Frontend Tooling

```
<script src="{% mix 'main.js' %}"></script>
```

TailwindCSS, webpack also pre-configured

```
bun run mix
```
